My Cookbook

Make it, share it, savor it. What's Cookin'?

What is My Cookbook?

My Cookbook turns your pantry into meals! Input ingredients, get recipes, create your own, and share them in our community forum—all with your personal account.

What's new in Version 5.0?

- **User Accounts:** Log in for a personal hub with your recipes, posts, and settings all in one place.
- **Custom Recipes:** Create your own dishes—add ingredients and steps, then save or share them.
- **Social Media Forum:** Post pics, share recipes, and chat with other cooks in a lively foodie community.
- **Favorite Recipes:** Mark your top picks, like that killer chili, for quick access anytime.
- **Refactored APIs:** Smoother, faster performance behind the scenes—better searches and posting, no hiccups.
What's next?

- **More Social Features:** Boost the community with new social perks! Follow favorite users to catch their latest recipes and posts, send private messages for one-on-one chats, and check out a "Trending Posts" feed showcasing the hottest dishes and ideas from the My Cookbook crowd.
- **One-Tap Shopping:** Simplify shopping with a single button on favorite recipes. Tap it, and all ingredients, like pasta or chicken, jump straight to your shopping list, tied to your account for easy access at the store.
- **Multiple Meal Plans & Shopping Lists:** Create and save different meal plans under your account, like "Weeknights" or "Dinner Party," each with its own shopping list. Switch between them effortlessly to keep your cooking organized.

Our project features 70+ passing unit tests with 80% code coverage!
